No. 5

DOUG CURRIE FOR PRESIDENT ENGINEERING SOCIETY

Schoolmen, one of the most important selections you will have to make for the coming year is the executive which will guide the functioning of the Engineering Society. The men whom you choose will have the power to direct the Engineering Society in any manner in which they see fit. It is thus essential that you choose men who have the qualifications necessary to direct, plan, and control the Society's activities in a manner which will at the same time suit you, the undergraduates, the faculty and what is most important, a critical and war-conscious public.

As chief officer of the Engineering Society, the President must be a man experienced not only in the organization and functioning of the Society but also in active leadership. He must successfully combine the qualities of aggressiveness and initiative with the ability to accept the ideas and suggestions of his executive. He must have the versatility and energy to do a thorough job. In short he must combine the qualities of the executive with those of the diplomat.

These factors have all been kept in mind in nominating DOUG CURRIE as President of the Engineering Society. In each of his three years at School, Doug has been gaining experience in executive work. In both first and second year he represented his class on the executive of his departmental club. This year as President of the Class of 4T5 he has taken over a year which had been left with him as the sole executive and directed its activities in a thorough and efficient manner. Much valuable experience has been gained in organizing and acting as co-organizer of many School social functions. Doug's versatility has been demonstrated by his active interest in athletics as a member of the School Rugby and B.W. and F. teams in first, second and third years.

This record marks Doug Currie as your logical choice for President. You may be sure that your interests and School's interests will be his interests.

BOB MOORE FOR PRESIDENT OF THE ENGINEERING SOCIETY

The University of Toronto Engineering Society has functioned for sixty-nine years to help build up traditions which have welded the student body and alumni of the school into an integral and dynamic whole. Engineers from every clime, country and calling look back with love and loyalty upon that "Old Red Schoolhouse". The office of president of the Engineering Society plays the most important factor in building up this tradition.

The essential qualities of this president must be experience and ability.

BOB MOORE as 4T5 Secretary-Treasurer last year and as Treasurer of the Engineering Society this year has had the opportunity to gain that experience. During the past year he sat on the Freshmen Reception, School Dinner and School At-Home committees as finance member and on the School Nite committee as Vice-Chairman. This committee work has enabled him to get a clear view of every phase of the Engineering Society's work.

Bob had the privilege of playing on the Senior Rugby, Lacrosse and Hockey teams for School this year.

You can be sure that BOB MOORE will do more than his share to keep the Engineering Society at its high standard. He will tackle the job with enthusiasm, ability, and experience.

Make sure—VOTE MOORE.

TIME: 12.00 to 1.30

PETE AYKROYD PRESIDENT OF THE ENGINEERING SOCIETY

The election of the executive of the Engineering Society is something to THINK about. The positions these men fill during the year call for capability in a number of fields and the President in particular must be able and experienced. When you vote, THINK about the candidate, and when you THINK about PETE AYKROYD there should be no doubt about his suitability for the job.

His record shows him to be a LEADER. As President of his Second Year and as Second Vice-President of the Engineering Society he has successfully filled two leadership positions.

His record shows him to be a MANAGER. Executive ability has been displayed throughout his years of service as manager of the 1942 Freshman Reception, Soph Frosh, year parties and particularly the Supply Department this year.

His record shows him to be an ORGANIZER. All these jobs require organization and he had conferred on him the honour of being chosen to organize and lead the Red Cross Blood Donors' Drive, a large and difficult assignment.

His record shows him to be EXPERIENCED. PETE AYKROYD has served on School Dinner, School At-Home and School Nite Committees and has had a wealth of experience on committees and sub-committees of the Engineering Society.

We feel, looking at the record, that there is no man who fills the requirements for President as well as PETE AYKROYD and if you stop and THINK of the service he is offering, you will not hesitate to vote AYKROYD FOR PRESIDENT.

AYKROYD FOR PRESIDENT
